

The Inventory Management module in **EXAM-RIS** allows you to easily track the inventory of all consumable products used in your facility.

The Inventory Master Maintenance screen provides full information about each item you maintain in inventory. This allows you to see the points at which you should reorder as well as the cost and selling price of each unit.

If branches are in use at your site, you can also see the information about inventory at branches other than your own. This can be very helpful if you want to transfer inventory between branches.

## Barcodes

While it is always possible to enter inventory transactions using the **EXAM-RIS** data entry screens, most customers prefer to use a bar code reader. This is not only much faster, it also eliminates the errors that can occur when typing data.

Using a bar code reader, you can quickly scan the part code, and where applicable, your branch code.

## Reports

The **Inventory Master** report contains full information about the items in your inventory.

SWEARINGEN SOFTWARE VERSION 52										Date: 6/19/2008
INVENTORY MASTER CODE SEQUENCE										Time: 8:40:17 AM
										Page: 1
CODE	DESCRIPTION	UNIT NAME	UNIT PRICE	PIECES /UNIT	UNITS ON HAND	REORDER QTY	REORDER POINT	OVERSTOCK POINT	TOTAL DOLLARS	
1	AMES X-RAY JACKETS	BOX	0.00	200	0.00	0	0	0	\$0.00	
1012	10 X 12 ULTR VISION FILM	BOX	0.00	100	0.00	0	0	0	\$0.00	
1111111111	TESTING ITEM 1/10 DIGITS	EA	0.00	1	0.00	0	0	0	\$0.00	
1114	11 X 14 ULTRA VISION FILM	BOX	0.00	100	0.00	0	0	0	\$0.00	

The **Inventory Exception** report provides information about the inventory quantities that are either at or below their reorder point and need to be reordered. The report also provides information about quantities that are at or above their overstock point.
