Scheduling System

The Scheduling module is a key component of EXAM-RIS for many customers and is...

Flexible enough to adapt to the ever-changing conditions within your clinic.

Powerful enough to be used for centralized scheduling within a hospital.

Scheduling System

Room Master

Managing the schedules for the rooms in your facility is easy, flexible, and powerful!

Define up to three periods of availability for each day.

Choose from five different time slot sizes to meet the requirements for each room.

Allow or prevent multiple booking.

Allow or prevent an exam to be scheduled in the room when **EXAM-RIS** identifies a conflict.

Management Blocks

Schedule downtime for equipment maintenance, holidays, or staffing needs by entering a management block on the room.

Specify days and times when schedulers are prevented from setting an appointment in the room.

Allow or prevent an over-ride on the blocked schedule.
