

**CoActiv Medical** offers web-based options for convenience and ease of use. The following modules are available via the web:

- Results Viewer
- Web Schedule Requestor

**CoActiv Medical** offers the **EXAM-RIS Results Viewer**. This feature allows referring physicians to view results (for their patients only) over the Internet using just a standard web browser, such as Internet Explorer.

This feature requires a Web server running Microsoft Internet Information Server version 5 or higher. The customer's IT department will be required to setup and maintain the server including any routers, firewalls or other equipment needed. A suitable, high-speed Internet connection is also required.

# Web-Based Options

The **Web Schedule Requestor** allows referring physicians and/or patients to request an appointment online at their convenience. The facility's scheduler may then review the requests in real-time and contact the patient to set up the actual appointment. This fully automated system provides more efficiency and convenience for both hospital or clinic staff and their patients.

Logged in as: katheryn

Define patient information.

Select the desired procedure and reason.

Detail the ordering physician and priority of the exam.

Users may then define the desired times for the appointment and submit their request.

A scheduler will then contact the user to schedule the procedure.
