

About CoActiv Medical

CoActiv Medical™ is a leading healthcare software and IT systems provider offering a full line of PACS, digital image and data storage services and related solutions for hospitals, imaging facilities and medical practices of all types and sizes.

CoActiv's EXAM-PACS® family of web-based PACS solutions provides leading edge, affordable and scalable image management with sophisticated tools that cater to the needs of radiologists as well as a full range of other imaging specialists.

Available as both enterprise server-based and cloud-based solutions, EXAM-PACS is designed for easy integration into imaging facilities of any size.

Comprised of modular software components, EXAM-PACS enables any site to customize a solution to meet their specific needs and budgets or to add advanced functionality to an existing PACS solution.

The EXAM-PACS suite includes EXAM-FILER® CD-burning solution; vendor-neutral, HIPAA compliant, offsite/online cloud-based EXAM-VAULT® QUAD-REDUNDANT ARCHIVING®; patent-pending

automatic EXAM-SENDER® referring physician system; EXAM-3D® advanced, multi-modular 3D color reconstruction and visualization; and EXAM-NET™ teleradiology suite.

EXAM-PACS includes such premium features as support for breast specific gamma imaging (BSGI) and storage of non-DICOM data, such as prescriptions, reports and surgical plans in patient files.

Complementing this is CoActiv's family of EXAM-RIS® solutions scaled for imaging facilities of every size site and budget.

EXAM-PACS, EXAM-FILER, EXAM-VAULT, QUAD-REDUNDANT ARCHIVING, EXAM-RIS, EXAM-SENDER and EXAM-3D are registered trademarks of CoActiv, LLC. EXAM-NET and EXAM-BROWSER are trademarks of CoActiv, LLC.

EXAM-BROWSER™

EXAM-BROWSER is CoActiv's cloud-based, zero-footprint universal DICOM viewer! EXAM-BROWSER works from EXAM-VAULT, gives referring and attending physicians access to exams from any platform—Windows, Linux, Mac, iPhone, iPad, and all Android and other tablets and smartphones, and provides real-time multi-user collaboration.

CoActiv EXAM-VAULT®

Taking advantage of today's leading edge IT technologies, CoActiv EXAM-VAULT® offers an innovative cloud-based, vendor-neutral data storage system - unrivaled for its accessibility, reliability, security and cost-effective pricing. In fact, EXAM-VAULT storage, with its unique QUAD-

REDUNDANT ARCHIVING®, is so reliable that CoActiv provides a 100% Archive Up-Time SLA (Service Level Agreement). This SLA is unprecedented in the industry.

In more than six years of operation, none of our clients has had a second of downtime!

The power of EXAM-VAULT starts with this unique QUAD-REDUNDANT ARCHIVING system, which stores every study four times - in four geographically distinct locations - to ensure protection in the event of almost any type of disaster.

Complementing this, EXAM-VAULT is designed to provide immediate business continuity, quickly restoring data access in emergency situations to keep the wheels of radiology turning when most other backup systems fail. Naturally, our advanced architecture also enables immediate image access for ongoing, everyday radiology needs.

As a managed service, CoActiv EXAM-VAULT shifts the burden of all archive

system maintenance to our own internal IT experts. Our commitment to ongoing technology upgrades makes technology obsolescence a thing of the past. And CoActiv EXAM-VAULT can be integrated with most other PACS for only pennies per exam, offering an affordable and highly scalable archiving solution for radiology departments and practices of any size... local or enterprise.

As part of the vendor-neutral EXAM-VAULT system, a server is typically located at the image

acquisition site to store recent images for six to 12 months, or more, enabling ultra-fast online data availability.

Additional online storage is accomplished at two state-of-the-art datacenters housing redundant, mirrored multi-terabyte RAID

CoActiv's Redundant Datacenter in Stamford, CT

arrays. These include a CoActiv/Level (3) Communications Tier-IV center in Stamford, CT, benefiting from the resources of one of the largest communications and Internet backbones in the world.

Complementing this is CoActiv's Tier-IV

datacenter in Tarrytown, NY, the former Union Carbide World Headquarters built by IBM. Both centers reside on different power grids and Internet peering points to ensure emergency fail-over coverage.

CoActiv's Primary Datacenter in New York

Finally, exams are also archived permanently to two 25-year archival DVDs, one remaining in a CoActiv secure storage center and the other sent to the imaging site for local access and storage.

With cloud-based CoActiv EXAM-VAULT, you no longer have to be concerned about maintaining local archives or clumsy tape drives. And of course, costly and hard-to-store film is now history. All exam retrieval from the archive utilizes our high-bandwidth resources rather than expensive, and often limited, local bandwidth. All exams are also instantly available for automatic transmission to referring physicians - also utilizing our bandwidth and not yours.

EXAM-VAULT vendor neutral archiving is available for as little as pennies per-exam per-year, or on a one-time per exam fee.. Compare this to the cost of film or local archiving or to other archive solutions!
